Tractor splitting device 2 trolleys + 1 pathway

- Universal splitting device adaptable for all tractor models.
- Space between the trolleys from 500mm to 1600mm (3900mm with the optional extension)
- Charge per trolley : 4 Tonnes
- Cleats to prevent lateral slippage and ensure optimum safety
- Optional stabiliser to secure the device in dismantling mode (1T weight load / 600mm to 900mm adjustable height)
- The casters allow one person to move the rolling rail
- Adjustable height with precision with special effortless design
- A screw system blocks the trolley on its rails for maximum security during use.
- The guided carriages on the rail help maintain perfect alignment throughout the uncoupling
- (Useful) length of rail: 2250 mm (4500 mm with extension)
