

9HYCM15V2

Hydraulic wheel trolley with wheel pivot system

- **INNOVATION:** Wheel pivot system made simple thanks to its handle. Turning the handle pivots the wheel using the tread.
- **unrivalled handling:** just one person can now handle a tyre without needing help.
- For easily and comfortably replacing large wheels, even ones with deep tread
- Robust safety support to quickly secure the wheel during transport
- Great handling thanks to its four large robust swivel wheels
- Optimal user safety
- Wheel support and alignment system
- Hydraulic lever system controls the gap between the rollers to lift and lower the wheel
- Easy assembly (just 8 bolts)
- More ergonomic than the 9HYCM15
- Max wheel thickness : 1200 mm
