

## 6AB3395

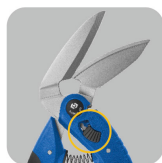

### Multipurpose scissors

- Scissors designed for cutting soft materials such as tin foil, plastics, cardboard, paper, etc.
- The curved shape of the blades makes the scissors more stable and saves strength when cutting.
- The slider locks the opening of the blades in 3 positions: closed, half-open, open.
- The wide angle between the handle and the blades allows the user's hand to never touch the material when cutting.
- Iron and aluminum wire cutting notch.
- 420J2 stainless steel blades (HRC52~55).
- High hardness blades, including 1 non-slip micro-serrated blade, perfect for making precise cuts.
- Ergonomic, comfortable and durable handles.
- Handles with anti-slip coating in PP + TPR.

• Iron wire cutter

• Large angle of blades

• Small angle of blades

• Big angle design between blades and the handles of the scissors
