

9TYC1101500

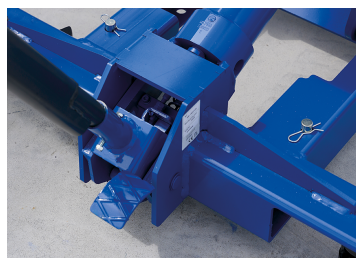

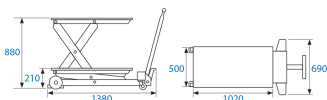

Single scissor hydraulic lifting table (1500 kg)

2006/42/CE

Note : Under no circumstances should you work below a lifted load without having secured it using mechanical supports. This table is equipped with safety pins that allow the table to be blocked at different heights.

- Allows lifting, lowering and possibly moving over short distances loads weighing up to 1.5 tonnes.
- "Quick-lift" pump pedal for a quick approach.
- Large ergonomic and non-slip handle facilitating operations.
- Silent polyamide wheels: will not damage garage floors, will not rust, and can facilitate maneuverability.
- Wheels equipped with brakes.
- Table equipped with an automatic lowering adjustment and control system (L.C.S) to avoid sudden movements.
- Built-in safety overload valve.
- Manual dead man's release for optimum safety when lowering.
- The table can be locked at different heights thanks to the safety pins.
- Hydraulic stroke limitation.

	Capacity (ton)	Lift plate dimensions (mm)	Lifting height (mm)	Rear Width B (mm)	Frame length L1 (mm)	Frame width L7 (mm)	Weight (kg)
9TYC1101500	1.5	1020 x 500	210 - 880		1380	690	130
