

6BJ21

Cordless butane gas glue gun

GS (Geprüfte Sicherheit) certified

- Wireless, it is easily transportable and practical to use.
- Its automatic thermal regulation system maintains an optimal flow of the glue, thus avoiding overflows and clogging of the nozzle.
- With automatic stop of the butane flow when the device reaches 180°C, then automatic restart below 160°C, allowing to maintain an optimal operating temperature.
- Fast heating (2 to 3 minutes).
- With 1 heating indicator LED.
- Hot air exhausted through the top of the glue gun, allowing for a more secure flat lay than a side air exhaust model.
- Quick and easy gas filling (only 3 seconds).
- Gas flow ON/OFF switch to prevent unintended use.
- Comfortable and ergonomic handle.
- Suitable for many areas of application: fixing work, repairs, fitting out, decoration, precision bonding, creative hobbies, etc.
- Suitable for a wide range of materials such as wood, paper, glass, fabric, metal, plastic, ceramic, etc.
- Powerful and durable, the 9BJ21 has passed the test of 250 hours of continuous work.
- 2 glue sticks of ø 11 mm included.
- Butane not included.
- INSTRUCTIONS FOR USE:
 - <ul style="padding-left: 15px;">
 - <li style="padding-left: 15px;">- Fill the gas tank.
 -

KING TONY

Enjoy your work

Automatic temperature control turns off at 180° and turns on under 160°

	Gasreservoir (ml)	Operating time (minutes)	Type of gas	Ø glue sticks (mm)	Dimensions (mm)	Temperature range (°C)	Heating time (min)	Weight (g)
