

9CJ74

Tungsten Carbide Scraper

- The blade tip is made of tungsten carbide material, which offers high hardness and a long lifespan. Available in 16mm and 32mm width.
- It can be used to scrape off residual carbon deposits, rust marks, or silicone residue from surfaces of objects, such as old silicone on oil sumps, exhaust manifolds, or brake calipers.
- The blade tip is equipped with a protective cover.
- The rear end has a hanging hole.
- Scrape off glue.
- Scrape off rust.
- The blade tip has been finely ground on all four sides, allowing for both pushing and pulling motions.
- Ergonomic handle, providing a comfortable grip.
